# Why This Matters

California Prop 65 applies to every smoked seafood product sold in the state.

## WARNING

*This product can expose you to chemicals including lead, cadmium, and benzo[a]pyrene, known to the State of California to cause cancer and birth defects or other reproductive harm.*

— [P65Warnings.ca.gov](http://P65Warnings.ca.gov)

***Multiple Exposure Pathways***

### Smoked Fish = Target Category

Seafood — including sardines, salted fish, and smoked products — is cited in heavy-metal NOV's every month.

### Smoking Creates PAHs

The smoking process itself generates benzo[a]pyrene — a listed Prop 65 carcinogen with strict thresholds.

### Spices Carry Heavy Metals

Chili, paprika, garlic, and other spices frequently test positive for lead and cadmium.

### Documentation Is Your Defense

Without a system, companies settle. A defensible record ends threats cheaply.

## WHY

# Why Spicy Garlic Tinapa Is at Risk

*Multiple Prop 65 exposure vectors converge in a single SKU.*

### Herring (fish)

Cadmium and mercury bioaccumulate in fish flesh.

### Smoking process

Generates benzo[a]pyrene and related PAHs — listed carcinogens.

### Garlic & spicy flavors

Imported chili, paprika, garlic powder can carry lead and cadmium.

### Packaging & oil

Cans, pouches, and oil may introduce BPA/BPS or phthalate exposure.

FINISHED PRODUCT

## Spicy Garlic Tinapa

*Four Prop 65 pathways.  
One product. One system to manage them all.*

**Lead (0.5 µg/day), Cadmium (4.1 µg/day), and Benzo[a]pyrene are all listed Prop 65 chemicals — each must be independently evaluated.**

W H Y

# Business Impact of Non-Compliance

*A Prop 65 action hits the balance sheet long before a verdict.*

## 60-Day Notice of Violation

Plaintiff's attorney files with the AG; clock starts on response.

## Settlement Exposure

Typical food-category settlements \$20K–\$150K+ per action, plus attorney fees.

## Relabeling & Reformulation

Product pulled, warning labels added, sourcing & sourcing processes re-evaluated.

## Retail & Distributor Pressure

Asian grocers, H Mart, 99 Ranch, Seafood City demand compliance before reinstatement.

*Most companies settle — not because they're guilty, but because their documentation is weak.*

## WHAT

# Core Technical Components

*The compliance stack underneath every determination we issue.*

### Heavy Metal Testing

Oversight of Lead (MADL 0.5 µg/day), Cadmium (MADL 4.1 µg/day), and Mercury at ISO 17025 labs — fish, spices, oil.

### PAH Testing (Smoke)

Benzo[a]pyrene and the EU-4 PAH panel screened on every smoked lot — the smoking process itself is a listed exposure source.

### Exposure vs MADL Evaluation

Serving-size math (ppm × grams per serving) for each chemical independently. Any single pathway can trigger a warning.

### Supplier COA Verification

Incoming fish, spice, and oil COAs cross-checked against screening thresholds per lot.

### Warning Label & Packaging Review

Warn vs no-warn logic + BPA/BPS review for cans, pouches, and liners.

WHAT

# Supply-Chain Compliance Control

*Prevent the issue upstream — before it reaches your label.*

*Prevent exposure issues before they reach the consumer — and the courtroom.*

HOW

# The SystemsBuilder Approach
