Why This Matters

California Prop 65 applies to every ingredient in the bowl — and their exposures stack.

⚠️ WARNING

This product can expose you to chemicals known to the State of California to cause cancer, birth defects, or other reproductive harm.

— P65Warnings.ca.gov

Recipe ≠ Exempt

Avocado alone carries ~8× the Prop 65 lead safe-harbor per serving.

Enforcement Is Aggressive

Private plaintiffs ('bounty hunters') file the majority of 60-Day Notices — the AG doesn't need to lead.

Penalties Are Real

Non-compliance leads to financial penalties, legal costs, relabeling, and product removal from shelves.

Applies to Every Ingredient

No exemption for avocado, onion, cilantro, lime, salt, or packaging. Every ingredient contributes to the per-serving exposure calculation.

Documentation Is Your Defense

Without a compliance system, most companies settle. A defensible record is what ends threats cheaply.

Prop 65 Enforcement Trends (2024–2026)

Enforcement is increasing, not slowing down.

~38%	Food & Beverage Largest single category of Prop 65 enforcement in 2025.
~\$86M	2026 Settlements Record enforcement activity — majority paid to attorneys.
Pb + DEHP	Lead + Phthalates Stack Ingredient lead plus packaging phthalate migration is the #1 composite-food failure mode.

Why Guacamole Is at Risk

Every ingredient contributes — and the exposures stack per serving.

Avocado Flesh

Naturally carries ~4.5 µg Pb per raw serving — ~8× the Prop 65 safe harbor

Aromatics & Herbs

Onion, garlic, cilantro, jalapeño — pesticide residues plus soil heavy metals

Acid & Salt

Lime juice contributes citrus pesticides; salt can carry trace lead

Packaging & HPP Tub

Flexible plastics & lidstock may migrate DEHP / BPA into high-fat matrix

Prop 65 is measured per serving — a recipe that combines lead-carrying ingredients compounds exposure.

Lead, cadmium, arsenic, DEHP (phthalates), and BPA are all on-category concerns — every ingredient and every packaging component counts toward the daily dose.

Business Impact of Non-Compliance

A Prop 65 action hits the balance sheet long before a verdict.

60-Day Notice of Violation

Plaintiff's attorney files with the AG; clock starts immediately on response.

Settlement Exposure

Typical settlements \$20K–\$100K+ per action — plus attorney fees.

Relabeling & Reformulation

Product pulled, warning labels added, ingredient sourcing reviewed.

Retail & Distributor Pressure

Buyers demand evidence of compliance before reinstatement or renewal.

Most companies settle — not because they're guilty, but because their documentation is weak.

Core Technical Components

The compliance stack underneath every determination we issue.

Heavy Metal Testing

Lead (MADL 0.5 µg/day), Cadmium (MADL 4.1 µg/day), Arsenic (NSRL 10 µg/day) at ISO 17025 labs — per ingredient and per finished batch.

Pesticide Residue Screening

Multi-residue GC/LC-MS panel across avocado, onion, garlic, cilantro, jalapeño, tomato, and lime.

Recipe-Level Exposure Stacking

Per-serving daily exposure calculated across ALL ingredients — the composite is what Prop 65 regulates.

Packaging Migration Testing

DEHP, other phthalates, and BPA migration studies on HPP tubs, lidstock, and flexible films (high-fat matrix — higher migration risk).

Grower & Co-Packer COA Verification

Every ingredient lot and every packaging component tied to a supplier COA and a compliance determination.

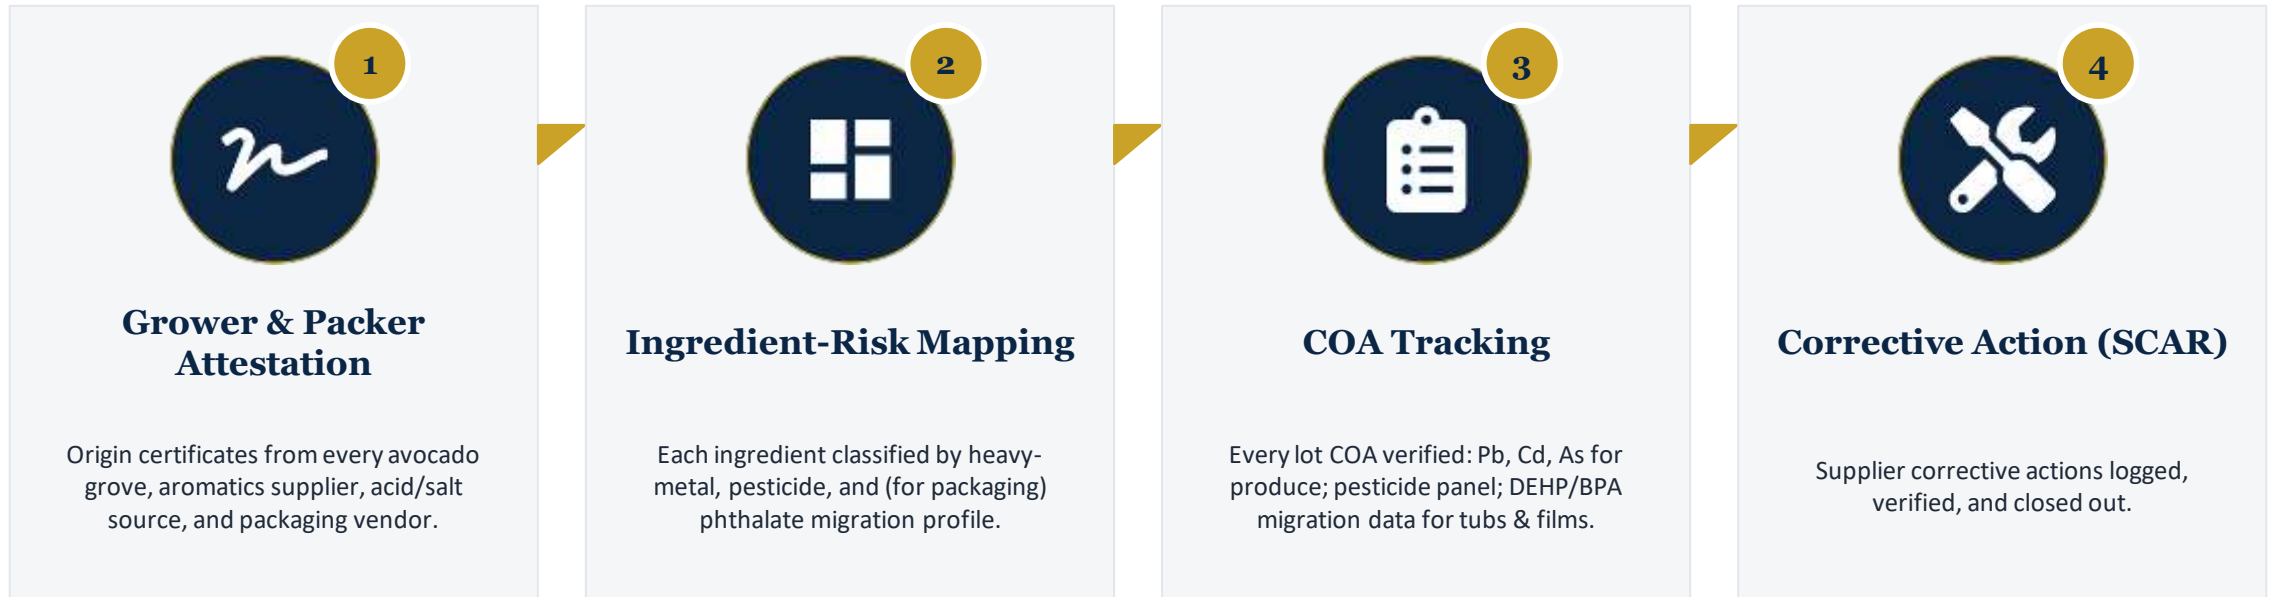

Warning Label Determination

Clear 'warn vs no-warn' logic documented and defensible against private enforcement.

Supply-Chain Compliance Control

Prevent the issue upstream — before it reaches your label.

Prevent exposure issues before they reach the consumer — and the courtroom.

The SystemsBuilder Approach

Artifact-based compliance — pay for structure, not repetition.

ARTIFACTS vs RECORDS

You pay for the structure — not the records.

Build once. Use forever.

Example:

ARTIFACT (you pay)

↓ Generates unlimited ↓

RECORDS (no added cost)
